

August Membership Meeting

Wednesday, August 18, 2010

Building Information Modeling (BIM) Benefits & Risk - *Panel Discussion*

Presented by: Tony Polusny, P.E., SECB Principal M&J Consulting Structural Engineers

Robert Grosz, P.E., Engineering Manager, TPAC, A Div. of Kiewit Western

& Andy Hill, DPR Construction

Join a discussion on why BIM is influencing the AEC market and why. The panel (with audience participation) will summarize current applications in the design community through the eye's of a structural engineer, the construction industry through the eyes of an estimator and the downstream applications of production through a subcontractor.

*Please visit our website to get bio background of all three speakers:
