**25 YEARS OF
CERTIFICATION** 

May 4 - 7, 2010

&

October 5 - 8, 2010

ACI Concrete Construction Special Inspector

A Concrete Construction Special Inspector is a person qualified to inspect and record the results of concrete construction inspection based on codes and job specifications. The ACI certification program covers inspection during pre-placement, placement, and post-placement operations. Certification requires a knowledge of concrete construction, including plans reading, formwork installation and removal, reinforce-

ments, embedments, sampling and testing freshly mixed concrete, conveying, placing, consolidation, finishing, jointing curing, and protection. In past years, ACI has run this as a joint certification program with ICC, but has recently decided to run this as a separate, stand alone program in order to keep the content more up to date, and to expand the scope past just code requirements and into specifications and construction practices.

The Only Prep Course in the Southwest!

The Arizona ACI Chapter conducts a 3 day preparation course aimed at preparing the experienced inspector to take the two part certification exam, which will be given at the conclusion of the program on the 4th day. The exam consists of two parts; a multiple choice general knowledge exam, and a separate plan reading exam designed to test an applicant's ability to read and interpret reinforced concrete drawings. Applicants who pass both exams, meet the experience requirements, and currently hold a certification as a Field Testing Technician Grade 1 will be issued a certification as a Concrete Construction Special Inspector. Those that do not currently meet the experience requirements will be issued an Associate Concrete Construction Special Inspector certification.

Fax Completed form to 602-926-8163 or mail to 318 E. Thomas Rd. Phoenix, AZ 85012

Register Today

Register today to receive your publications early and insure your spot in this limited seating program. For more information on this ACI certification program, visit www.concrete.org/certification. For questions about this program visit www.azaci.org.

Instructor Information

The prep course will be presented by Luke Snell, PE. Mr. Snell is an Eminent Scholar with ASU's Del E. Web School of Construction where he teaches courses for their Concrete Industry Management Program. He is also a frequent instructor for many of ACI's training programs and seminars and has taught this course to an international audience in preparation for becoming certified.

Program Information

Registration fees are \$1,150.00 for all participants. City of Phoenix employees may receive a discount by contacting our office. Payment must accompany registration. Upon receiving your paid registration, the Arizona ACI Chapter will send you a confirmation letter along with all of the course documents. Participants are required to bring the materials to the class. The class will be conducted from 8:00 am to 4:30 pm each day, with the certification exam being conducted on the fourth day. Cancellations received after your materials have been sent to you will receive refunds as follows: at least two weeks prior to the session start date - \$700, between two weeks and three days prior to the session start date - \$500, less than three days prior to the session start date no refunds will be given. Programs are conducted in compliance with ADA requirements. Requests for special accommodations must be made in writing at least two weeks prior to the session start date.
