Oct. 11, 2008 - PHOENIX

Nov. 15, 2008 - PHOENIX

AGGREGATE TESTING TECHNICIAN & LABORATORY TESTING TECHNICIAN

ACI has recently re-written the scope and requirements for obtaining the Aggregate Testing Technician and the Laboratory Testing Technician Certifications. Beginning in 2008, a person will need to obtain both the Strength Testing Technician and the Aggregate Testing Technician Certifications (within two years of each other) in order to obtain certification as a Laboratory Testing Technician. Once an individual obtains both of these certifications, ACI will automatically issue them a Laboratory Testing Technician Certification.

The Arizona Chapter plans to begin offering the new Aggregate Testing Technician Certification Program in the 1st quarter of 2008.

TERMS AND CONDITIONS - Sessions may be canceled or rescheduled by applicant prior to 14 days of the session date without incurring any charges. Canceling or rescheduling within 13 days of the session date will incur a \$100 fee. If you do not cancel your registration and fail to show up for your scheduled session, the entire registration fee will be forfeited. Recording of the review and testing sessions is prohibited. Copyright of review and testing materials is retained by the producer and the attendee is not to copy or reproduce these materials in any way. The Arizona Chapter of ACI hosts and produces these sessions—The American Concrete Institute owns and governs the Certification Programs and makes all final decisions on certification status. Sessions may be changed or cancelled by the Chapter at any time. Session attendance is limited in size, registrants are scheduled on a first come first served basis. Incomplete registration submittals will not be processed. Additional sessions may be scheduled—visit www.azaci.org for the latest schedules and availability or call 602-334-4854.

Payment must be made with this application form in order to be scheduled. One application per person per session.
